TOOL SUPPLY COMPANY

Nelson & Storm Tool Supply Co. is a company focused on improving your machining processes and providing automated MRO supply inventory control processes that include barcoding and vending systems.

Nelson & Storm has served the Rockford area since 1950. We offer the area's largest local inventory. Delivery is available to you within 6 business hours in our local delivery area. We also offer same-day UPS shipping until 4:30 p.m.

Nelson & Storm's diverse inventory includes:

- Cutting tools (standard and special)
- Toolcrib/MRO supplies
- Precision measuring tools & inspection equipment
- Abrasives
- Saw blades
- Cutting fluids
- Safety supplies & PPE
- Material handling
- Tool boxes/chests/modular cabinets
- Fixture components
- Tape
- Hand tools
- Diamond tools & more

Our website also lets customers shop 24/7.

Review every tool used every day.

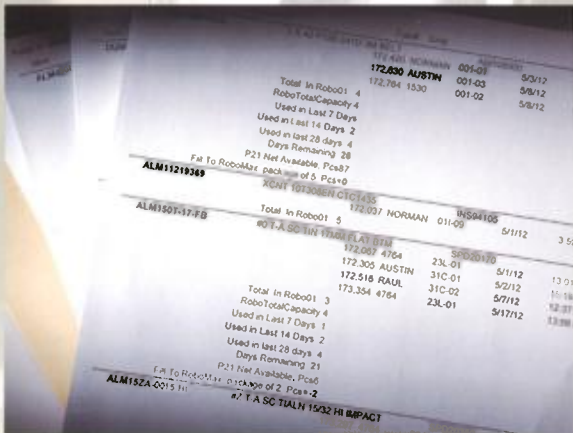

It's impossible to be competitive today without using automation.

You don't machine your parts manually,  
then why do you manage your inventory control that way?

Are you tired of running out or substituting tooling to complete your jobs?

Tired of machine downtime?

Tired of supervisors or machine operators spending time on the phone,  
instead of time on the machine, to locate the tooling you need?

Item ID	Location	Quantity	Used In Last 7 Days	Used In Last 14 Days	Used In Last 28 Days	Days Remaining	P21 Net Available	Pack Size
ALM11219369	172.030 AUSTIN	005-01	4	2	4	28	28	5 Pcs*0
ALM1501517-FB	172.007 NORMAN	011-09	5	1	2	21	21	2 Pcs*2

You outsource special processes that cannot be completed in house, why not your inventory management system of MRO perishable tools? Leave your tooling inventory to the experts.

Nelson & Storm eliminates those problems without costing you valuable man hours or machine downtime. Our proprietary software looks at every tool you use every day and projects the amount of days available. When inventory is running low, we restock your vending system. You make more valuable use of your time by eliminating the need to cut purchase orders and analyze tool inventory. You also save on freight charges by eliminating many expensive next-day shipments.

We provide the most sophisticated vending systems in the area. Our first vending system was installed in 1997. Today, we furnish and monitor more than 30,000 bins in vending systems.

We offer technical support for the newest tooling technology. Our task is to introduce those new tools to you to optimize productivity.

### JETSTREAM TOOLING™ COOLANT STRAIGHT TO THE EDGE

Jetstream Tooling delivers coolant directly to the cutting edge which lifts the chip away from the rake face, improving chip control and tool life. Jetstream Tooling has been proven to work in nearly all material groups and with a wide choice of coolant pressures.

### THE ECONOMICAL SQUARE 6™ MILLING CUTTER

The leader in low-cost productivity, Square 6, with its tight tolerance pockets and a 90° setting angle ensures a true 90° square shoulder in one operation, saving valuable production time and resulting in a high-quality surface finish.

### THE NEXT GENERATION DOUBLE OCTOMILL™

With 16 cutting edges it offers unmatched economy in terms of edge cost per insert. The easy-to-handle Double Octomill, with its positive insert geometry, makes a unique contribution to milling performance and productivity.

### THE DURATOMIC™ REVOLUTION

Duratomic, the world's first atomically-modified coating technology, is harder and tougher which means more consistent tool life, higher speed capability, and a wider application window than traditional coatings can provide.

**Cutting Solutions**
